

AWS Direct Connect Now Available in CoreSite's Miami Market

November 29, 2018

AWS Direct Connect Now Available at CoreSite's Miami Facility through the CoreSite Open Cloud Exchange and Metro InterSite Connectivity

DENVER--(BUSINESS WIRE)--Nov. 29, 2018-- CoreSite Realty Corporation (NYSE:COR), a premier provider of secure, reliable, high-performance [data center](#) and [interconnection](#) solutions across the U.S., today announced CoreSite's [Miami facility](#) as an additional location to offer [Amazon Web Services \(AWS\) Direct Connect](#). Through the [CoreSite Open Cloud Exchange](#) or via Metro InterSite connectivity, customers can directly access AWS cloud services over a private, enterprise-grade network connection. The benefits of direct access include low-latency connectivity, enhanced network security, reliable network performance, and significantly reduced data transfer costs.

With this expansion, CoreSite customers have private access to all commercial AWS Regions in the United States across all eight CoreSite markets using the CoreSite [Open Cloud Exchange](#), Metro [InterSite](#), or through fiber [cross connects](#). Through the variety of connectivity options into AWS, CoreSite is able to support service rates from 50Mbps up to 10Gbps.

"At CoreSite we are focused on enabling our enterprise customers to easily and efficiently adopt and deploy hybrid- and multi-cloud solutions by providing reliable, high-performance connectivity solutions," said Gerry Fassig, Vice President of Sales, Cloud & Hosting at CoreSite.

CoreSite is an Advanced Tier Technology Partner in the AWS Partner Network (APN) and has been providing CoreSite customers with AWS Direct Connect services since 2011. AWS Direct Connect provides a dedicated network connection between an Enterprise's network and an AWS Direct Connect location. CoreSite customers can privately access AWS Direct Connect through a cross connection or through high-performance, SLA-backed virtual connections via the CoreSite Open Cloud Exchange. AWS Direct Connect provides a private, low-latency alternative to connecting over the public internet or backhauling from a corporate data center. AWS offers compute power, database storage, and content delivery along with access to over 70 products, including AWS Direct Connect, to enable hybrid-IT solutions.

CoreSite's [Miami](#) facility provides connectivity from the U.S. to South America and serves a diverse community of customers, including enterprises, domestic and international carriers, CDNs, cloud computing and IT service providers. Additionally, CoreSite's Miami facility is built to withstand a Category 5 hurricane. CoreSite's stringent security criteria, reliable uptime and preparedness processes were put to the test during Hurricane Irma and our data center and team of experts proved effective, with no impact to customer infrastructure.

About the CoreSite Open Cloud Exchange

Established in 2013, the [CoreSite Open Cloud Exchange](#) is one of the first exchange platforms of its kind, built to virtually unite enterprises, networks and cloud providers, including major public clouds such as AWS, Microsoft and Alibaba Cloud. Unlike using the public Internet, the CoreSite Open Cloud Exchange establishes direct, secure, virtual connections—enabling more control, reliability, and security for your data. Additionally, CoreSite's user-friendly online portal allows on-demand access for CoreSite customers to interface directly to virtual cloud environments. Through individualized portals, customers maintain control of data in real time, providing the scalability and elasticity essential for cloud applications and one-to-many architectures.

Forward Looking Statements

This press release may contain forward-looking statements within the meaning of the federal securities laws. Forward-looking statements relate to expectations, beliefs, projections, future plans and strategies, anticipated events or trends and similar expressions concerning matters that are not historical facts. In some cases, you can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "may," "will," "should," "seeks," "approximately," "intends," "plans," "pro forma," "estimates" or "anticipates" or the negative of these words and phrases or similar words or phrases that are predictions of or indicate future events or trends and that do not relate solely to historical matters. Forward-looking statements involve known and unknown risks, uncertainties, assumptions and contingencies, many of which are beyond CoreSite's control that may cause actual results to differ significantly from those expressed in any forward-looking statement. These risks include, without limitation: any adverse developments in local economic conditions or the demand for data center space in these markets; operational difficulties, including difficulties relating to information systems, internal processes and information security; significant industry competition; financial market fluctuations; and other factors affecting the real estate industry generally. All forward-looking statements reflect CoreSite's good faith beliefs, assumptions and expectations, but they are not guarantees of future performance. Furthermore, CoreSite disclaims any obligation to publicly update or revise any forward-looking statement to reflect changes in underlying assumptions or factors, of new information, data or methods, future events or other changes. For a further discussion of these and other factors that could cause CoreSite's future results to differ materially from any forward-looking statements, see the section entitled "Risk Factors" in CoreSite's most recent annual report on Form 10-K, and other risks described in documents subsequently filed by CoreSite from time to time with the Securities and Exchange Commission.
